

1, they are in the same group sharing the same WEB API key.

2, They share the same economy, inventory and Jason settings except ID number

3, Playfab add on setting. All I have done here is change different id.

(1) Try with the 188XXXX application ID

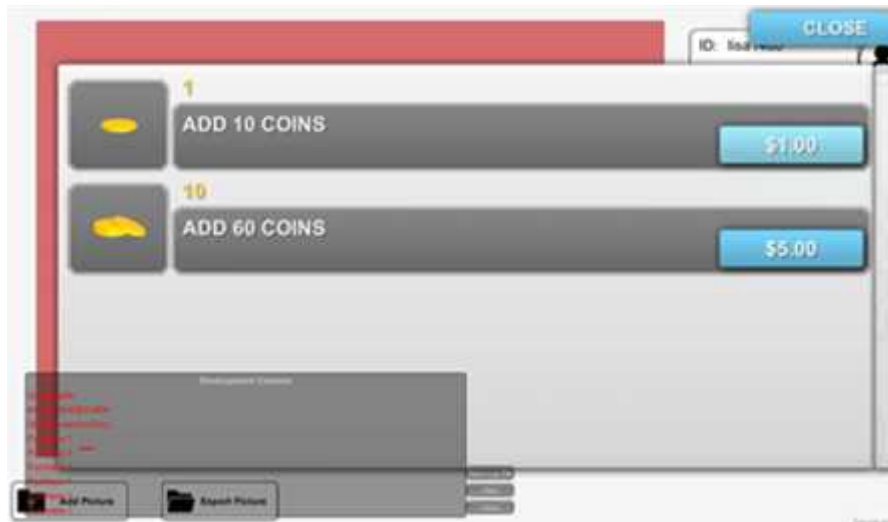

Run the application from steam terminal.

Playfab login succeed.

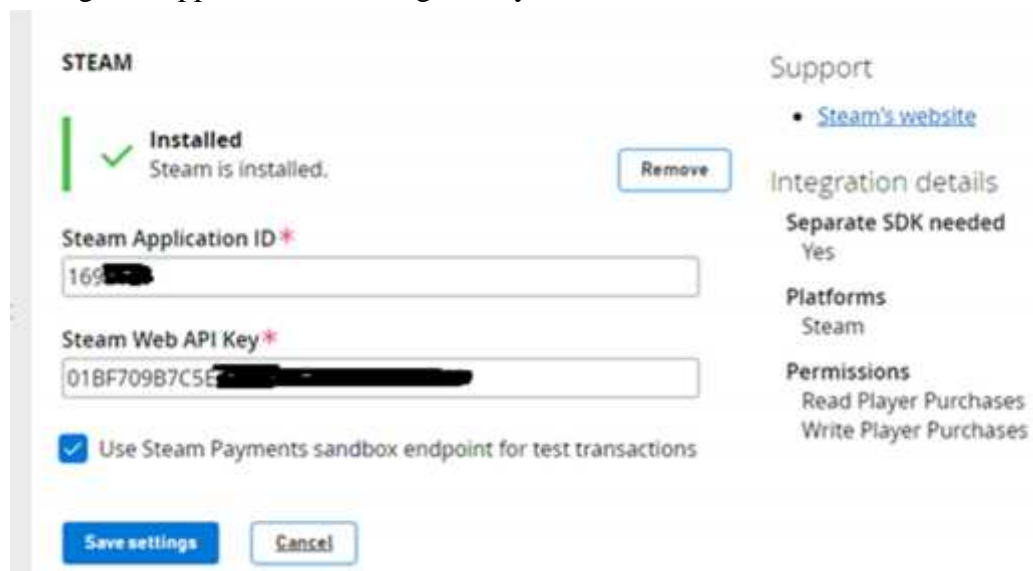

The steam purchased page didn't show after clicking on the \$1 or \$10 buttons. Purchased failed.

(2) Try with the **169XXXX** application ID

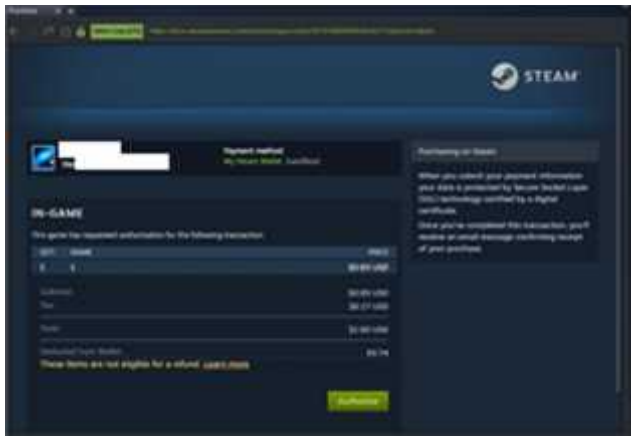

Change the application id setting in Playfab:

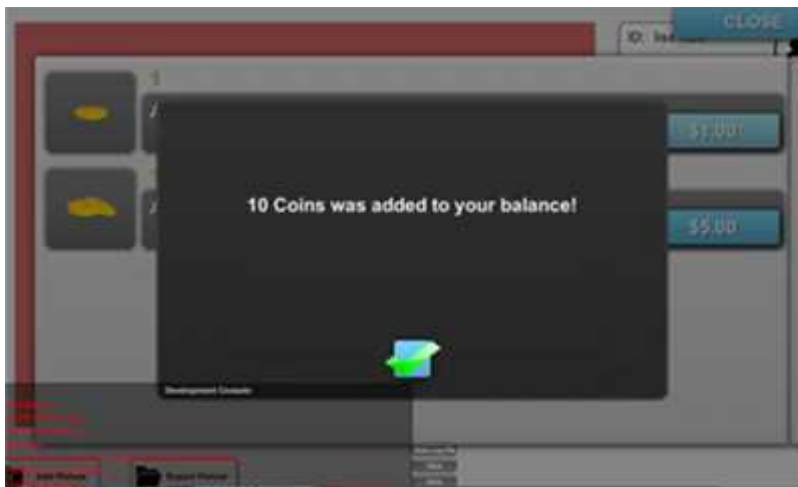

Run the application from steam terminal

Playfab login succeed.

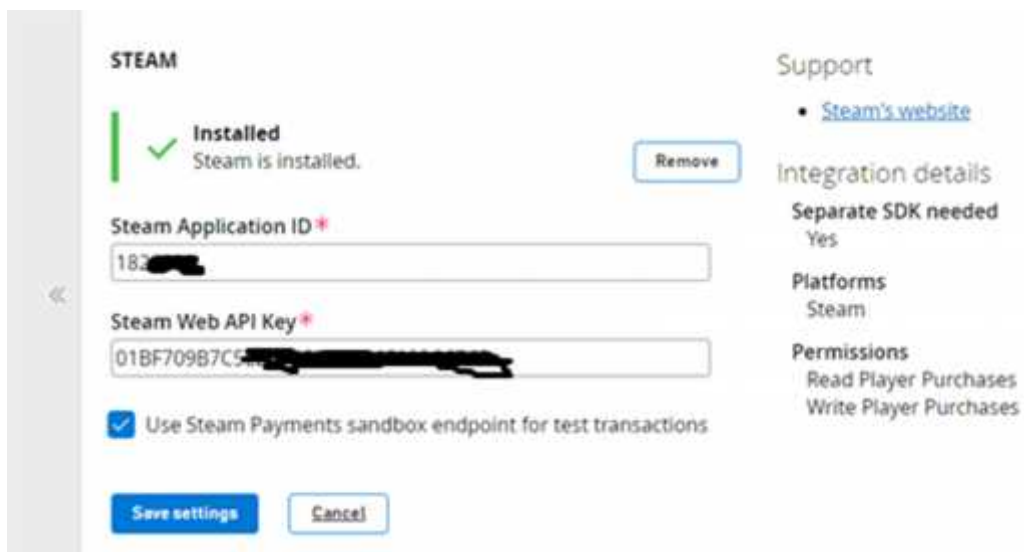

Clicked 'Top Up' and the \$1 button then the steam purchased page run normally.

Top up succeed.

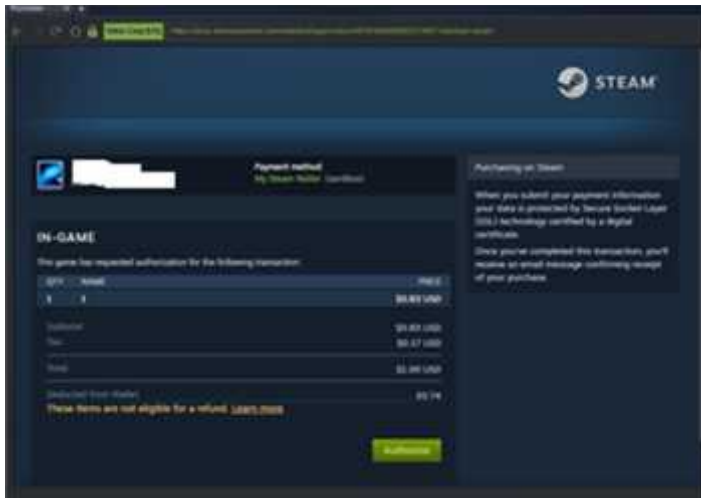

(3) Try with the **182XXXX** application ID

Run the application;

Playfab login succeed.

Clicked 'Top Up' and the \$1 button then the steam purchased page run normally.

Top up succeed.
